Hello,

My name is Juan Hernandez and I live on 351 Adena St, Pasadena, CA 91104 with my parents and uncle. The residents and myself have concerns over the proposed development that will require us to relocate. We don't want to leave the place that we've called home for many years. Some of us have been here for more than two decades. This is even more concerning with the ongoing pandemic that has put a strain on our economy and our jobs. Many of us have been furloughed or had our hours cut back due to this pandemic. I myself had a job offer recently rescinded due to the pandemic and I don't know what the future holds for my family and I. Assuming the worst case scenario of having to vacate by the end of year, we will put us in a very difficult position. Covid-19 is set to return this fall. As a result, the economy will have to slow down again to combat the pandemic with many businesses closing and many people being furloughed, like my dad and uncle that work in the restaurant industry, which is one of the hardest hit industries. Where is my evidence you ask? On top of Dr. Fauci saying many times that the virus will come back with even bigger impacts in the fall, the last 3 months have proven that this virus has very serious consequences if we simply ignore it. I find this proposal unethical and immoral to kick families out of their homes during such uncertain and stressful times. If this proposal were to pass, it will not only show the ignorance by the committee and owners of the situation we the residents face ahead of the pandemic, it will also show the lack of concern the owners and the committee have towards the residents living at 351 Adena St. So, I urge you to reconsider this proposal in hopes that we the residents won't have to deal with more stress on top of everything else.

Thank you,
Juan Hernandez
