DESCRIPTION: This project provides for the undergrounding of electrical utilities and the installation of a new street lighting system using energy efficient lighting on Howard Street from Lincoln Avenue to Raymond Avenue.

JUSTIFICATION: This project will improve street lighting for traffic and pedestrian safety. The energy efficient lights will reduce the City's environmental carbon footprint. The energy efficient street lamps have a longer life than other lamps and consume approximately 50 percent less energy. Undergrounding of electrical facilities will improve streetscape aesthetics and system reliability.

SCHEDULE: This project will begin in FY 2015.

RELATIONSHIP TO THE GENERAL PLAN: This project is consistent with the Public Facilities Element Objective 2 by providing more efficient development and utilization of public facilities. In addition, the project is consistent with Public Facilities Element Objective 5 by providing a high level of design quality in all public streets.

IMPACT ON THE NORTHWEST: This project is located in Northwest Pasadena which is an area that has been targeted for revitalization.

HISTORY: This project was created in FY 2007 and fully funded in FY 2015.
