Greetings Talyn,

I would like to submit the following comment for reading at the Hearing Officer meeting today. The link provided on the agenda — <https://www.cityofpasadena.net/planning/public-comment/> does not work. Thank you for forwarding this to the appropriate person.

### TO BE READ FOR PUBLIC COMMENT

I would appreciate knowing why the cumulative proposed changes were not treated as an Amendment to the Master Plan. Dividing the changes into smaller projects subject to CUP to minimize the extent and to classify them as ‘minor’ seems inconsistent with past actions. How was the assertion of minimal significance arrived at? I can understand a 10% rise in student enrollment perhaps not substantial enough, but coupling that with a 43% rise in the number of faculty is substantial, as is the proposal for visible, outdoor tandem parking. This segmentation seems contrary to customary practice.

Thank you,

1

Mic Hansen
