Hello, Tess—

Maria Juliani sent me information about the meeting to be held today pertaining to basement construction.

I wholeheartedly support more stringent regulations relating to basement construction for single family dwellings. The basement construction project next door to Maria and to me has been challenging to endure—Maria and her family have suffered the brunt of it. It has been challenging for our surrounding neighbors as well.

I welcome the adoption, implementation and enforcement of strict guidelines for basement construction—addressing issues of noise, proximity, equipment usage, and more.

Thank you.

Annina Punaro
