Dear Alison,

Please find below 3 responses to the Notice of Public Hearing for CUP #6832. They are individual responses, with individual email addresses included (please redact names and email addresses for the public record). If you have any questions, please call me at [REDACTED]. Thank you for your consideration.

Sincerely,  
Valinda Richardson

Response #1:

[REDACTED], [REDACTED]

Regarding CUP #6832: As a long-term resident of the North Arroyo neighborhood, I respectfully request that you reject this conditional use permit application. The monopine was improperly constructed in violation of city codes and should be removed. Please do not allow it to remain in any form.

Response #2:

[REDACTED] [REDACTED]

Regarding CUP #6832: As a long-time homeowner in the North Arroyo residential neighborhood, I ask that the city reject this application. I am concerned that a variance would create a precedent for more telecommunications facilities. We do not want a tangle of "tree" towers in this area.

Response #3

[REDACTED]

Regarding CUP #6832: As a long-time homeowner in the North Arroyo residential neighborhood, I support the city in denying this application. The neighbors do not want wireless facilities and associated equipment of any kind, especially if they have been constructed without city approval.

I would like to voice my support for the approval of the existing wireless telecommunications facility structure located at 2122 N. Arroyo Blvd. The structure supports the vital need for effective cell phone communication. Reception in this area is already weak at best and not approving this tower could put residents in danger should we have a catastrophe of any kind that would demand cell communications.

And the tower is not an eyesore to the community in which I live.

This is exactly why I am moving full steam ahead fighting for this site to keep it as is.

We do not want to initiate another full site build to compensate for the loss in coverage that we will lose if we decrease the height.

We have scouted locations for small cells in the instance that this case doesn't get approved. We can install (4) small Cells facilities in the public right of way to assist with coverage but they will most likely need to be in front or directly near residences. We attempt to refrain from planting any wireless facilities in residential.

Regards,

Jillianne Newcomer | | Permit Department Manager [REDACTED]

Hi Jillianne,

Here is an additional comment that we received for the project:

I would like to voice my support for the approval of the existing wireless telecommunications facility structure located at 2122 N. Arroyo Blvd. The structure supports the vital need for effective cell phone communication. Reception in this area is already weak at best and not approving this tower could put residents in danger should we have a catastrophe of any kind that would demand cell communications.

And the tower is not an eyesore to the community in which I live.
