Hello Kevin, please share my e-mail with the Historic Preservation Commissioners and the applicant.

I am hoping the Landscape Architect and the homeowners would consider relocating the 30" Olive tree instead of cutting it down.

Olive trees can easily be transplanted and the survival rate is very good when done by a reputable company.

I am pleased to see that the applicant is proposing to plant 7 field grown olive trees instead of the 4 trees the city is requiring them to do should the olive tree in question be approved for removal at tonight's meeting.

Having said that, keeping the 30" protected olive tree on site and moving it to a different location would be wonderful and the right thing to do.

Olive trees are so beautiful and can live for hundreds of years so why not let this one do the same at 1100 South Grand.

Thank you for considering my request.

With Best Regards,

Emina Darakjy
