Hello,

I've listed several questions concerning upcoming project:

1. Where will the new building's HVAC equipment, including the chiller and cooling towers be, since these items can produce large amounts of vibration and noise? What will be done to reduce noise and vibration levels?
2. What is a builder or developer's legal responsibility to neighboring buildings to minimize dust, noise and other common problems?
3. Give notification of demolition; 6-8wks
4. Noise, especially early in the morning and late at night; garbage, dust and debris.
5. Damage to adjacent properties caused by project
6. Level of excavation
7. Will project have insurance for demolition, construction and excavation
8. Do you agree with: minimize dust, noise and other common problems?
9. Your construction noise mitigation plans

Thank you

Kepa Dalere & Jay Arca
