

DISTRICT **6** NEIGHBORHOOD NOTICE

A MESSAGE FROM DISTRICT 6 COUNCILMEMBER STEVE MADISON

Though in the same general area, the work on Habitat Restoration is a separate project from the sediment removal.

Devil's Gate Reservoir Restoration Project **Notice: Implementation of Habitat Restoration Phase 2**

Beginning Wednesday, October 7th, Los Angeles County Public Works will begin implementation of Phase 2 of the habitat restoration activities as detailed in the California Department of Fish and Wildlife-approved Habitat Restoration Plan for the Devil's Gate Reservoir Restoration Project over an approximate one-month period. The work will include grading that will recontour soil and help improve conveyance of water flow during inclement weather as well as improve the distribution of water throughout the mitigation area. Phase 2 will include the use of construction equipment for grading soil in Johnson Field, the Mining Pit, and areas adjacent to the Mining Pit. The improved hydrology will better convey flows within the restoration area for the benefit of the habitat. This construction activity, under supervision of Public Works and the County's environmental consultant, is separate from the reservoir sediment removal operations. Some soil from the habitat area will be exported to Manning Pit. This project work will occur during the same hours as the regular sediment removal schedule (7 a.m. to 3:30 p.m.) and it is expected to be completed by mid-November 2020, weather permitting. Public Works will maintain the same dust mitigation protocols and continue to monitor the air quality in the new work areas.

The Phase 2 grading work will be followed by planting and seeding with native riparian species, approximately 50 percent of which will be harvested from the Hahamongna Watershed Park by the Hahamongna Native Plant Nursery. In Phase 1 of the habitat restoration, 300 coast live oak acorns, 10,346 container plants, and approximately 713 lbs. of seeds have already been planted.

For more information on the Devil's Gate Reservoir Restoration Project, including the Habitat Restoration Plan which covers these Phase 2 restoration activities, visit the website at DevilsGateProject.com. You can also send inquiries to devilsgateproject@pw.lacounty.gov or call (626) 458-2507.

Thank you for your interest and involvement in the project,
