Helpful Opportunities for Mental Health Education
Pasadena Mental Health Day
May 18, 2019
“You may know from your own personal experience that when someone demonstrates compassion for another, movement can happen. As we move forward in advocating for mental health and quality of life, I ask each of you to boldly consider what your mental health challenge is AND what meaningful impact you would like to make. Mental health applies to every one of us. Let’s learn about ways to be more compassionate toward our own mental health needs, and the needs of others, by making it a state of mind.

The starting point is awareness, and it can start with a mental health day event. Pasadena Mental Health Day 2019, “HOME: A State of Mind” is a helpful opportunity for MENTAL HEALTH education [H.O.M.E.] and EMPOWERMENT for those facing mental health challenges and for those seeking ways to advocate for themselves and those in need!

Opportunities to serve, as well as compassion and companionship, are key to our healing and health. Thank you for taking the first step by attending PMHD2019. I hope you discover the benefits of healthy living and coping, community engagement, and compassionate service on mental health and homelessness. The entire community stands to gain when we learn and build together, and demonstrate compassion for one another - Make it a state of mind.”

- Salina Corral, PsyD, Chair Pasadena Mental Health Advisory Committee

Keynote Speakers - Chef Tony & Ann Lancaster of Hope Café & Catering
For over 25 years, Chef Tony and his wife, Ann Lancaster, have been serving up great meals throughout California and “restoring hope one order at a time” through their business HOPE Cafe and Catering. Local Pasadena restauranteurs Tony and Ann, employ those who have been denied employment or have been seen as unemployable, including the homeless, the homeless in transition, veterans with post-traumatic stress disorder, and adults with physical and mental challenges. Hope Café’s mission is: “to reach the outcast, the outsourced, the overlooked, and teach them a trade, teach them how to feed themselves, feed their families and feed the community.”

Community Resource Fair
