Subject: Follow-up to AB52 consultation regarding Pasadena Transit Operations and Maintenance Facility

Andy,

Thank you for the consultation on November 9, 2017 regarding the Pasadena Transit Operations and Maintenance Facility project located at 2180 East Foothill Blvd, City of Pasadena, California.

We understand your concern that the project site may be located in the same general location as ancient trading routes. You have requested that a certified Native American Monitor be on site during ground disturbing activities. In response to your concern, we have prepared the following mitigation measure:

“During grading and excavation, a monitor meeting the satisfaction of the Gabrieleño Band of Mission Indians—Kizh Nation shall be present. Consistent with Mitigation Measure 4-1 in the Pasadena General Plan EIR, if Native American artifacts are found, all ground disturbing activities in the immediate vicinity of the find shall be halted until the find is evaluated by a Registered Professional Archaeologist. If testing determines that significance criteria are met, then the Project shall be required to perform data recovery, professional identification, radiocarbon dates as applicable, and other special studies; and provide a comprehensive final report, including site record to the City and the South Central Coastal Information Center at California State University, Fullerton. No further grading shall occur in the area of the discovery until the Planning Department approves the report. Subsequently, the find shall be turned over to the tribe of the resource’s origin. In addition, any cultural resources found shall be treated in accordance with regulatory requirements. Grading and excavation may continue around the isolated area of the find so long as the activities do not impede or jeopardize the protection and preservation of any cultural resources as determined by the Registered Professional Archaeologist.”

With this email, the City of Pasadena considers the AB 52 consultation for the subject project complete. Should you have any questions, please do not hesitate to contact me via email or at 626.744.6726.

Sincerely,
