1) NEIGHBORHOOD COMPATIBILITY:

Neighborhood compatibility is a requirement that ensures the house size is consistent with the surrounding neighborhood. It is based on the size of dwellings within a 500-foot radius of the subject property. Proposals may exceed the **MEDIAN** dwelling size (middle dwelling size, not the average dwelling size) within a 500 foot radius by no more than 35 percent without a Single Family Compatibility Permit. To exceed this amount, up to the floor area limitations specified in Zoning Code Section 17.22.040, approval of a Single Family Compatibility Permit is required. Additional information regarding this regulation can found in Zoning Code Section 17.22.050.E and 17.22.090.

The median dwelling size shall be determined using primary residence data from the Los Angeles County Assessor. Please use the worksheet provided on the following page, or you may create your own worksheet. Only include developed single-family lots, including the existing size of the subject property. Be advised, a neighborhood compatibility analysis may be obtained from City staff through a letter request. Please inquire through zoningquestions@cityofpasadena.net for form and fee.

Please complete the table below to enable staff to determine whether the proposal meets the neighborhood compatibility requirement.

NEIGHBORHOOD COMPATIBILITY	
Lot size of subject property, in square feet	
Number of developed single-family dwellings within a 500-foot radius (including subject property)	
Median dwelling size (excluding garages/carports or any accessory structures) within a 500-foot radius of subject property	
35% above median dwelling size	
Proposed dwelling size (excluding garages/carports)
