After my request, I received an email on June 13 from David Reyes stating that the complete Sweetflower CUP application would not be made available until Monday, June 17 (and after you erroneously advised people the city offices would be closed June 14). I replied stating my immediate need to inspect just an except, hoping that a physical inspection would get me at least some of the material before June 17.

The complete CUP application that was initially promised on June 17 was never provided.

These matters could be easily cleared up with a phone call but I note it is your practice to refuse to answer your phone and that you generally have refused to answer emails.

Mr. Truitt,

Previous requests pertaining to SweetFlower's CUP application are listed below. Please note the following:

- Email 1: Your request for SweetFlower's CUP on June 13, 2019 was modified to "view the mapping portions only" per your Jun 14, 2019, at 9:17 AM response in this attachment.
- Email 2: Your request to view the same documents a second time for both SweetFlower and Harvest is in this conversation. You were given access to view those documents on June 18, 2019.
- Email 3 and Email 4: On July 8, 2019, you submitted two emails requesting SweetFlower's CUP. This request is in process and will be provided to you in compliance with the California Public Records Act. Please note that we are processing requests as they are received. For reference, your request is PRA No. 11448.

Respectfully,

**CAUTION:** This email was delivered from the Internet. Do not click links or open attachments unless you know the content is safe.

This is now the 3rd day since you provided Sweetflower the CUP applications for Harvest and Atrium but have refused to produce the CUP application for Sweetflower.

Your actions are giving Sweetflower a competitive advantage by giving it access to competitor information while at the same time you are refusing to produce that information for Sweetflower.

I have been asking for Sweetflower's CUP application since June 13.
