How to verify if a person has a negative test for COVID-19

1 **Confirm person's name and, if listed, birthdate on the test result matches their photo ID**, AND

The documentation of the COVID-19 test result must show that:

2 **The test result is negative** (see below), AND

3 **The test was performed (swabbed) within the last 72 hours**, AND

4 **The type of test is antigen (Ag) or PCR/NAAT COVID-19 or SARS-CoV-2**, AND

5 **The result is from a laboratory, healthcare or test provider, or patient platform for the healthcare provider (e.g., Healthvana, etc.)**
(A COVID-19 self-test, sometimes referred to as "home test" is not acceptable.)

See examples below. The result can be a printed copy or on a phone (e.g., digital health record or email or text message from a test provider or laboratory).

What you'll see that indicates it was a COVID-19 PCR/NAAT or antigen test

Polymerase Chain Reaction/Nucleic Acid Amplification (PCR/NAAT) Tests
include, but are not limited to:
• Reverse transcription polymerase chain reaction (RT-PCR)
• Quantitative PCR (qPCR)
• Reverse transcription loop-mediated isothermal amplification (RT-LAMP)
• Transcription-mediated amplification (TMA)
• Molecular test or molecular diagnostic test
• Isothermal amplification
• Droplet Digital PCR or digital droplet PCR (ddPCR)
• Clustered regularly interspaced short palindromic repeats (CRISPR)

Antigen (Ag) tests
include, but are not limited to:
• Rapid antigen test
• Viral antigen test
• Antigen Chromatographic Digital Immunoassay
• Antigen Chemiluminescence Immunoassay
• Antigen Lateral Flow Fluorescence

COVID-19 serology tests, noted as antibody or Ab, IgG or IgM, are blood tests and <u>not</u> acceptable.

The test result you'll see that verifies the test was negative

Words or phrases describing a negative test could include, but are not limited to:

- NEGATIVE
- SARS-CoV-2 RNA NOT DETECTED
- COVID-19 NOT DETECTED

- UNDETECTABLE
- SARS-CoV-2 ANTIGEN NOT DETECTED
- NOT REACTIVE

Results marked "Invalid," "Quantity not sufficient," or "Indeterminant" are <u>not</u> accepted.

Check the:

1. Name matches photo ID
2. Result is negative
3. The test was performed (swabbed) within the last 72 hours
4. Test is PCR or antigen
5. Provider, laboratory, healthcare, or patient platform for the healthcare provider (e.g., Healthvana, etc.)
