CITY OF PASADENA HEALTH OFFICER ORDER
FOR THE CONTROL OF COVID-19

ORDER REQUIRING VACCINATION OF
HEALTH CARE WORKERS, UPDATED TO ALIGN WITH STATE HEALTH
OFFICER ORDER REVISION

THIS ORDER AMENDS AND SUPERSEDES
HEALTH OFFICER ORDERS ISSUED DECEMBER 23, 2021,
JANUARY 28, 2022 AND MARCH 1, 2022

This Order Issued: September 20, 2022, Revised September 28, 2022

This Order is in effect as of September 28, 2022 until rescinded in writing by the Health Officer.

UPDATES IN THIS ORDER HIGHLIGHTED IN YELLOW:

- Updated to align with the recent change to the State Public Health Officer Order, which rescinds the testing requirements (except as specifically noted to comply with federal requirements) for unvaccinated or exempt health care workers.
- Health Care Workers continue to be required to comply with the surveillance testing requirements of the federal Centers for Medicare and Medicaid Services.
- Facilities should maintain testing capacity at their worksite, and have the ability to ramp up testing at their worksite, in the event of outbreaks or if it is required again at a future date.
- Modifies the timing of boosters to require workers with a completed primary series vaccination and a recent COVID-19 infection to receive their booster dose at least 2 months but not more than 6 months after completing the primary series.
- No specific requirement as to “type” of booster, provided booster is FDA-authorized.
- Health Care Workers are required to wear face masks in health care settings.

Please read this Order carefully. Violation of or failure to comply with this Order is a crime punishable by fine, imprisonment, or both. (California Health and Safety Code §120295.)

SUMMARY OF THE ORDER: Since the start of the pandemic, the Pasadena Public Health Department (PPHD) has led with science and data to better understand and respond to COVID-19. Pasadena has seen a dramatic increase in the percentage of people who are fully vaccinated and boosted. Similarly, a high percentage of the population have experienced infection from recent variants. Since April 2022, the daily incident case rate of COVID-19 in the city of Pasadena has remained in the “High Transmission” level of the U.S. Centers for Disease Control and Prevention’s (CDC) indicators for Levels of Community Transmission.
The testing positivity rate in Pasadena also rose to the “High Transmission” level. In Los Angeles County where a large proportion of the people who work, visit, or patronize businesses in Pasadena reside, the rate of COVID-19 cases has increased to the “High Transmission” level, contributing to risk of transmission in this City. Hospitalizations from COVID-19 both locally and throughout Los Angeles County more than doubled. Since September 5, the community levels of transmission in the city declined to the “Substantial Transmission” level.

In addition, since the emergence of the significantly more transmissible World Health Organization (WHO)-designated Variants of Concern, including Delta and Omicron variants of the SARS-CoV-2 virus, have been detected in specimens collected from Pasadena residents with laboratory-confirmed COVID-19. COVID-19 vaccination and boosters continue to remain the most important strategy to prevent serious illness and death from COVID-19. COVID-19 vaccines currently authorized in the US have been shown to be highly safe and effective at providing protection against severe disease and are recommended by the CDC for all populations for whom the vaccine is authorized by the US Food and Drug Administration, including booster dose recommendations. The State Public Health Officer order of September 17, 2022 requires all healthcare workers currently eligible for boosters to be “fully vaccinated and boosted” by March 1, 2022. The State Public Health Officer’s Order was updated to allow for workers who have completed the primary series of COVID-19 vaccination and provide sufficient proof of recent COVID-19 infection after completion of their primary series, to defer their booster dose by up to 90 days from infection. To provide proof of recent infection, workers must provide documentation of previous COVID-19 diagnosis from a healthcare provider or confirmed laboratory results.

Hospitals, skilled nursing facilities (SNFs), home care residential settings, and the other health care facility types identified in this order are particularly high-risk settings where COVID-19 outbreaks can have severe consequences for vulnerable populations including hospitalization, severe illness, and death. The settings identified in the Order are places with frequent close contact between facility workers and highly vulnerable patients, including elderly, chronically ill, critically ill, medically fragile, and disabled individuals. Outbreaks in healthcare facilities, skilled nursing facilities, and other congregate settings have often been traced to unvaccinated staff members. Vaccination is the most effective way to reduce risk of COVID-19 virus transmission in healthcare facilities and home health care settings.

This Order directs all Workers, as defined below, be fully vaccinated and boosted no later than March 1, 2022 if currently eligible for a booster vaccination. Workers who have completed the primary series of COVID-19 vaccination or who are not yet eligible for a booster must receive a booster at least two (2) months but no more than six (6) months after completing the primary series. Workers in acute health and long-term care settings who are asymptomatic, unvaccinated or exempt are no longer required to undergo surveillance testing, except that workers in Skilled Nursing Facilities continue to be required to comply with testing requirements of the federal Centers for Medicare and Medicaid Services (CMS).

UNDER THE AUTHORITY OF THE CALIFORNIA HEALTH AND SAFETY
CODE SECTIONS 120175 et seq., AND THE PASADENA MUNICIPAL CODE SECTION 8.04.010, THE CITY OF PASADENA HEALTH OFFICER ORDERS:

1. This Order requires all Workers, as defined in paragraph 4 below, who provide services to or work in Health Care Facilities described in subdivision (a) below and in Home Care Settings under home care organizations described in subdivision (b), (“High-Risk Settings”) below to have completed their primary series of an FDA-authorized vaccine no later than September 30, 2021:

   a. Health Care Facilities include:
      i. General Acute Care Hospitals
      ii. Skilled Nursing Facilities (including Subacute Facilities)
      iii. Intermediate Care Facilities
      iv. Acute Psychiatric Hospitals
      v. Adult Day Health Care Centers
      vi. Program of All-Inclusive Care for the Elderly (PACE) and PACE Centers
      vii. Ambulatory Surgery Centers
      viii. Chemical Dependency Recovery Hospitals
      ix. Clinics and Doctors’ Offices (including behavioral health, surgical and dental)
      x. Congregate Living Health Facilities
      xi. Dialysis Centers
      xii. Hospice Facilities
      xiii. Pediatric Day Health and Respite Care Facilities
      xiv. Residential Substance Use Treatment and Mental Health Treatment Facilities

   b. Home Care Settings include:
      i. Home Care Organization
      ii. Home Health Agency

   c. All COVID-19 vaccines that are currently authorized for emergency use can be found at the following links:
      i. US Food and Drug Administration (FDA) COVID-19 Vaccines webpage
      ii. World Health Organization (WHO) COVID-19 webpage

2. All Workers who provide services or work in facilities described in subdivisions (a) through (e) are required to complete the primary series of an FDA-authorized vaccine in accordance with the CA Health Officer Order:

   a. All Workers who provide services or work in Adult and Senior Care Facilities licensed by the CA Department of Social Services;
   b. All in-home direct care service workers, including registered home care aides and certified home health aides, except for those workers who only provide services to a recipient with whom they live or who are a family member of the recipient for whom they provide services;
c. All waiver personal care services (WPCS) providers, as defined by the California Department of Health Services, and in-home supportive services (IHSS) providers, as defined by the California Department of Social Services, except for those workers who only provide services to a recipient with whom they live or who are a family member of the recipient for whom they provide services;

d. All hospice workers who are providing services in the home or in a licensed facility;

e. All regional center employees, as well as service provider workers, who provide services to a consumer through the network of Regional Centers serving individuals with developmental and intellectual disabilities, except for those workers who only provide services to a recipient with whom they live or who are a family member of the recipient for whom they provide services.

3. All Workers currently eligible for boosters, who provide services or work in facilities described in this order, must be “fully vaccinated and boosted” (up to date) for COVID-19 receiving all recommended doses of the primary series of vaccines and a vaccine booster dose pursuant to CDC Guidance on Staying Up to Date on COVID-19 Vaccines. For Workers who may have received World Health Organization emergency use listed COVID-19 vaccine, or those who received a mix and match series composed of any combination of FDA-approved, FDA-authorized, or WHO emergency use listed COVID-19 vaccines, reference the CDC Guidance Choosing Your COVID-19 Booster Dose, If You Were Vaccinated Outside of the United States for the appropriate booster dose and timing.

   a. Workers currently eligible for booster doses per the CDC Guidance on Staying Up to Date on COVID-19 Vaccines must receive their booster dose by no later than March 1, 2022. Workers not yet eligible for boosters must be in compliance no later than 15 days after the recommended timeframe above for receiving the booster dose.

   b. Workers who provide sufficient proof of COVID-19 infection after completion of their primary series may defer booster administration for up to 90 days from date of first positive test or clinical diagnosis, which in some situations, may extend the booster dose requirement beyond March 1. To provide proof of prior infection, workers must provide documentation of previous diagnosis from a healthcare provider or confirmed laboratory results. Workers with a deferral due to a proven COVID-19 infection must receive their booster dose no later than 15 days after the expiration date of their deferral.

4. For the purposes of this Order, “Worker” includes workers providing service within the jurisdiction of the Pasadena Health Officer, regardless of where the Worker’s agency is located. Worker refers to paid and unpaid employees, contractors, students, and volunteers who work in indoor and other settings where (1) care is provided to patients; (2) patients have access for any purpose, leading to direct or indirect contact between the worker and patients or exposure to SARS-CoV-2 airborne aerosols; or (3) home care or daily living assistance is provided to the residents. This includes workers serving in health care, prehospital care, patient transport, dental offices, other
health care settings or home health care settings who have the potential for direct or indirect contact with patients, residents or SARS-CoV-2 aerosols, including (but not limited to):

- Physicians and physician assistants
- Nurses, nurse practitioners and nursing assistants
- Medical assistants
- Dentists and dental assistants
- Medical technicians
- Pharmacists
- Phlebotomists
- Therapists
- Affiliated home care aides
- Registered home care aides
- Independent home care aides
- Home health aides
- Students and trainees
- Contractual staff not employed by the health care facility
- Any person, whether employee, independent contractor or volunteer, not directly involved in patient care but who could be exposed to or could expose another to infectious agents that can be transmitted in the health care setting, such as management, dietary, environmental services, laundry, security, engineering and facilities management, and administrative and billing personnel.

5. A Worker may be exempt from the vaccination requirements under paragraph 1 above only upon providing a signed statement that the Worker (1) has declined the vaccine on religious grounds or (2) is excused from receiving any COVID-19 vaccination due to a Qualifying Medical Reason.

To be exempt from the vaccination requirement due to a Qualifying Medical Reason, the Worker must provide to their employer a written statement signed by a physician, nurse practitioner, or other licensed medical professional practicing under the license of a physician that the worker qualifies for the exemption (do not include the nature of the underlying medical condition). The statement must indicate the probable date on which the Worker will be able to receive a vaccination or state that the duration of the underlying medical condition is unknown or permanent. See the most recent version of the Centers for Disease Control and Prevention’s [Interim Clinical Considerations for Use of COVID-19 Vaccines](https://www.cdc.gov/coronavirus/2019-ncov/vaccines/considerations.html) guidance.

6. Workers exempt from the vaccination requirements pursuant to paragraph 2 above or booster-eligible Workers who have not yet received their booster dose are no longer required to participate in surveillance testing for SARS-CoV-2 except that workers in skilled nursing facilities must continue to comply with testing requirements of the federal CMS. Facilities should maintain testing capacity at their worksite, and have the ability to ramp up testing at their worksite, in the event of outbreaks or if it is required again at a future date.
However, such Workers are required to wear a surgical mask or higher-level respirator approved by the National Institute of Occupational Safety and Health (NIOSH), such as an N95 filtering facepiece respirator, at all times while inside the facility, residence or other direct care settings.

7. The operator of the health care facility shall comply with all applicable privacy laws and regulations in the maintenance of Workers’ vaccination or exempt status.
   
   a. Upon request, a health care facility shall promptly provide vaccination or exemption records, including testing results, to the Pasadena Public Health Department or its designee and in any event no later than the next business day following the request.
   
   b. Operators of health care facilities subject to this Order shall maintain records pursuant to the California Department of Public Health (CDPH) Vaccine Record Guidelines & Standards with the following information:
      
      i. Full name and date of birth
      ii. Vaccine manufacturer
      iii. Date(s) of vaccine administration
   
   c. For unvaccinated Workers: the operator of the health care facility must maintain signed declination forms with written healthcare provider’s statement where applicable, as described in paragraph (5) above. Testing records (when required) pursuant to paragraph (6) must be maintained.

8. Nothing in this Order limits otherwise applicable federal and state requirements related to Personal Protective Equipment, personnel training, and infection control policies and practices for health care facilities. Public Health requires Workers to continue wearing a surgical mask or higher-level respirator approved by the National Institute of Occupational Safety and Health (NIOSH), such as an N95 filtering facepiece respirator, at all times while in the facility or in a residential care or other direct care setting.

9. Health care facilities covered by this Order are encouraged to provide onsite vaccinations, easy access to nearby vaccinations, and education and outreach on vaccinations, including:
   
   a. Access to epidemiologists, physicians, and other counselors who can answer questions or concerns related to vaccines and vaccinations and provide culturally sensitive advice; and
   
   b. Access to online resources providing up-to-date information on COVID-19 science and research.

10. All previous orders of the Health Officer, as revised, supplemented and/or amended and that have not been expressly rescinded or superseded, remain in full force and effect, except as provided herein. To the extent a conflict exists between this Order and any previous orders of the Health Officer, the previous orders are hereby superseded and this Order controls.
11. Protocols established by the Health Officer to implement health orders issued by the State Public Health Officer or the City of Pasadena Health Officer have the same force and effect as other Orders issued by the Health Officer. To the extent any health order of the Health Officer, including any protocols established to implement any health order, is more restrictive than any order or directive issued by the State Public Health Officer, the health order of the Health Officer shall control.

12. This Order applies to all persons within the City of Pasadena under the Health Officer’s jurisdiction.

13. Violation of this Order is a misdemeanor punishable by imprisonment, fine or both under California Health and Safety Code Section 120295. This Order will be enforced by the City of Pasadena Police Department, City Attorney/City Prosecutor’s Office, and/or any other agency designated by the Pasadena City Manager for enforcement.

14. If any subsection, sentence, clause, phrase, or word of this Order (or any other prior Order) or any application of it to any person, structure, gathering, or circumstance is held to be invalid or unconstitutional by a decision of a court of competent jurisdiction, then such decision will not affect the validity of the remaining portions of this Order (or any other prior Order).

IT IS SO ORDERED:

[Signature]

Date: 09/28/2022

Eric G. Handler, MD, MPH, FAAP
Health Officer, City of Pasadena
