pasadena active

transportation plan

The City of Pasadena is developing a citywide Active Transportation Plan to identify opportunities to improve sidewalks, bikeways, intersections, trails, and crossings, creating a safer, more connected, and accessible network for walking, biking, rolling, and transit use.

Your input will help guide future improvements, projects, policies, and funding.

Help shape
Friendly Streets
for walking, biking, and rolling!

What we know...

50% of trips in Pasadena are less than 2 miles

86% severe and fatal injury collisions occur on just 16% of city roadways

Short trips are especially good candidates for walking and biking enhancements.

Friendly streets are...

- **Safe** for every mode
- **Connected** for every trip
- **Comfortable** for every body

The ATP's goal is to make walking, biking, and rolling easy and stress-free.

Includes Community Engagement

SUMMER 2026	FALL 2026	WINTER/SPRING 2027	FALL 2027	WINTER/SPRING 2028
Project Initiation	1 Existing Conditions	2 Vision, Goals & Recommendations	3 Draft Plan	4 Final Plan Adoption

Tell us where Pasadena needs safer crossings, better bike lanes, or other improvements.
