Good morning,

I am working for Harvest which was one of your recent entities that was awarded a license so I stopped in to ask a few questions as there is just so few properties that appear to work. My first question is has any entity filed yet and if so in what district? The other question I have is in regards to one property. What I am trying to find out is if 60 S. California is being used as residential housing? It was obviously one at some time years ago and if it still is then it knocks out many possible properties.

Thank you,
Dave
