City Attorney Bagneris:

I submitted the public records act request reproduced below on July 11, 2019.

A response was legally required yesterday and city staff failed to respond by the statutory deadline.

This is now the 5th time I have informed you of yet another refusal by the planning department to produce public records within the statutory deadline.

Is staff conspiring to deprive me of my constitutional rights to this information because staff is attempting to get Harvest and others to block these requests like you did with the police union and the LA Times?

I wonder how you can even process a CUP that the applicant claims is a trade secret in its entirety and can't be shown to the public.

Other than sections detailing with security measures, nothing should be redacted.

Very truly yours,

Martin Truitt
