Mr. Reyes:

You specifically committed to provide daily updates of CUP activity.

Harvest filed a hard copy yesterday and paid its fee and once again your staff withheld critical information from the public.

I have an absolute constitutional right to participate in this process and that requires prompt access to government records.

The city manager has also falsely represented that all document are on the city's website when it is obviously not the case.

Where is any correspondence you have received from Harvest regarding the city manager's letter to them dated June 25, 2019?

If Harvest has not responded to the city manager's letter then why did you allow Harvest to file a hard copy of the CUP application and pay the fee?

Until I questioned it this weekend and it was fixed by the IT department, why was the marijuana regulations page formatted so that it concealed updates and just served most users old versions of the page?

Your failure to keep your word to me is absolutely disgraceful.
